

## Document 1

### Sea Freight Export Inspections

	2008-09	2009-10	2010-11
<b>Export Inspections</b>	<b>4165</b>	<b>2548</b>	<b>2599</b>

**Note:** Interpretation of these figures needs to be considered in the context of Customs and Border Protection's intelligence-led risk-based approach. This approach focuses on inspecting high risk export containers. As a consequence there is no defined target for the number of export inspections. Customs and Border Protection works with a number of other agencies to ensure export permit requirements are complied with.
