## ➤ Invacare® *Etude Duo*

### One Bed – Multiple Solutions

The Invacare® *Etude Duo* is unique. Its enhanced flexibility combines perfectly with *Etude's* reputable, robust bed construction. This model boasts a newly developed modular system. Simple upgrades now afford complete compatibility between, for instance, the basic metal and the fully-motorized wooden versions. And the new soft line design has transformed the *Etude* Bed into a stylish piece of furniture without compromising on safety, stability and longevity.

10

### ➤ Flexible Design & Durable Solutions

Invacare® **Etude Duo** is the perfect modular solution for homecare. For greater functionality, the 3-sectioned metal version can be fully upgraded to a 4-sectioned bed simply by adding a motor and a hand control unit. Similarly, you can give your **Etude Duo** a full make-over. Transform the **Etude Duo** from a metal to wooden bed using only the wooden kit. With the **Etude Duo** you get the best of both worlds; new design features such as softly rounded corners along with **Etude Duo's** better known, robust build and range compatible motor system.

### ➤ Safety Beyond the Call of Duty

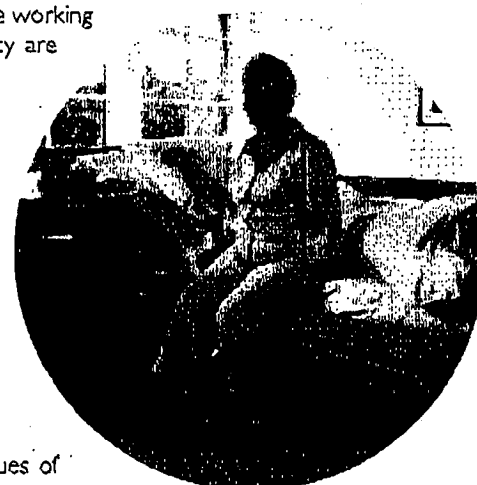

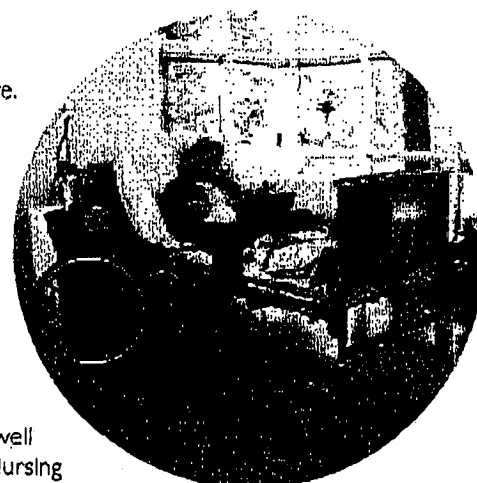

The **Etude Duo** is synonymous with Homecare bed safety going well beyond the requirements laid down by the European Standard for Nursing Beds and TÜV. Electrical safety is maximized by additional cable hooks which ensure the safe placement of motor cables. Also, the **Etude Duo's** lab testing program operates with loads 4 times the recommended safe working load capacity. True to the Invacare® tradition, quality and durability are guaranteed.

### ➤ Dual Heights mean Easy Transfer

The standard, built-in, double-brackets are designed to suit individual needs for transfers in different positions. Mattress support in the upper bracket allows an entrance height of 40cm, and in the lower brackets an entrance height of 33cm. When fitted with wooden siderails, the lower brackets lock automatically. This ensures that the distance between the wooden siderail and mattress support will always be 100% safe.

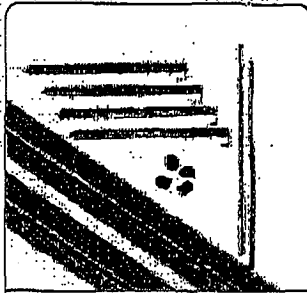

### ➤ Easy Handling & Storage

Easy assembly, portability and economical storage are intrinsic values of the Invacare® **Etude**-Bed range. Assembly couldn't be simpler. Attaching the mattress support to the bed ends is quick and tool-free. The **Etude Duo** is also lightweight and portable requiring negligible effort. Once the bed ends are attached to the transport unit just let the castors take the strain. What is more, its economical storage space requirements make it perfect for the homecare environment.

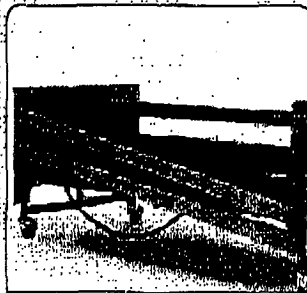

9

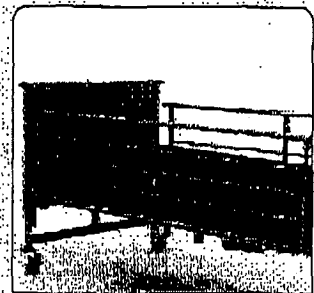

### Options

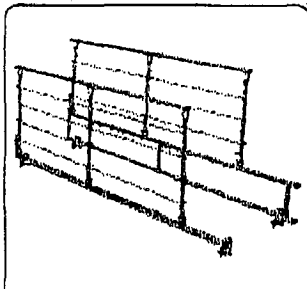

**Wooden upgrade kit:**  
Change the bed from steel version  
to wood version.

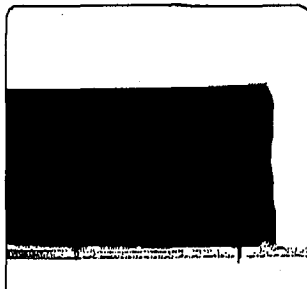

**Scala Mono: Wooden siderails**  
Upper and lower "release button"  
positioned on bedends for easy  
handling of siderails. Mattress  
heights up to 17,5 cm.

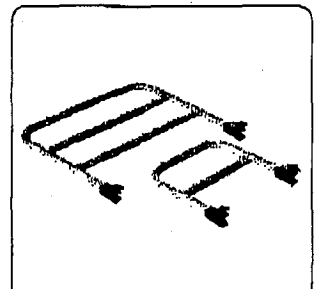

**Scala Basic: Steel siderails.**  
The safe standard siderail for  
**Etude Duo.** Mattress heights up  
to 17,5 cm.

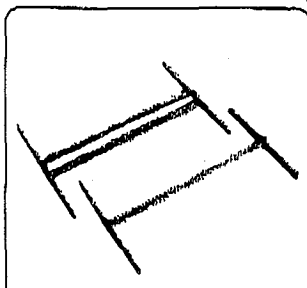

**Scala Medium og Scala Decubi**  
Siderails increased in height for  
mattress sizes up to 30,5 cm.  
The increased siderails **Scala  
Medium** and **Scala Decubi** offers  
additional safety for the patient.

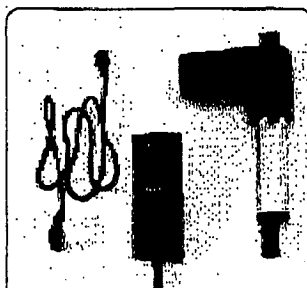

**Cover for siderail, padded**  
Padded cover for various metal  
siderails - **Scala Basic** range.  
The cover stays on when siderail  
is lowered.

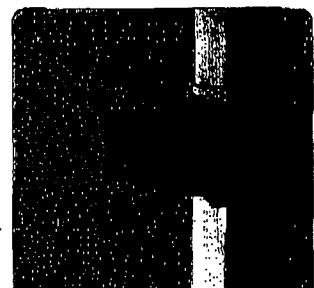

**Support handles.**  
Available in 5 different sizes.  
Make getting in and out of bed  
much easier for the patient.

**Individuality & Customisation**  
Mattress support extension  
facilitates optimal length adjustment  
to suit every possible requirement.  
Choose between 10 cm to 20 cm  
extension.

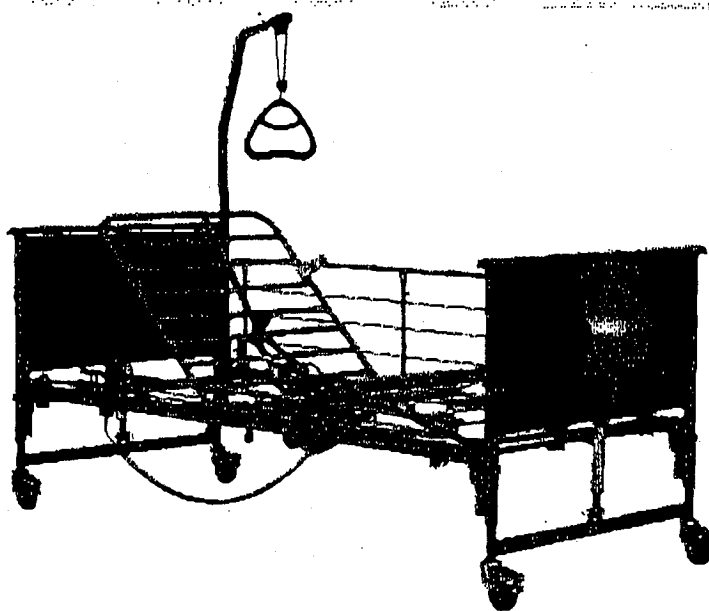

**Motor upgrade kit:**  
Opportunity to change the bed  
from 3- to 4-sectioned.

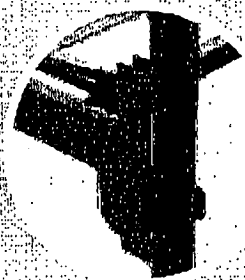

**Bedend without motor cover.**  
For a low cost solution the bed is  
available without the motor cover.

8

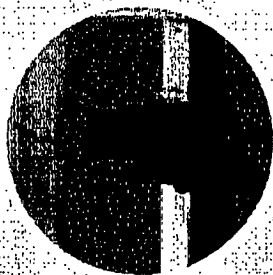

Invacare® Etude Duo

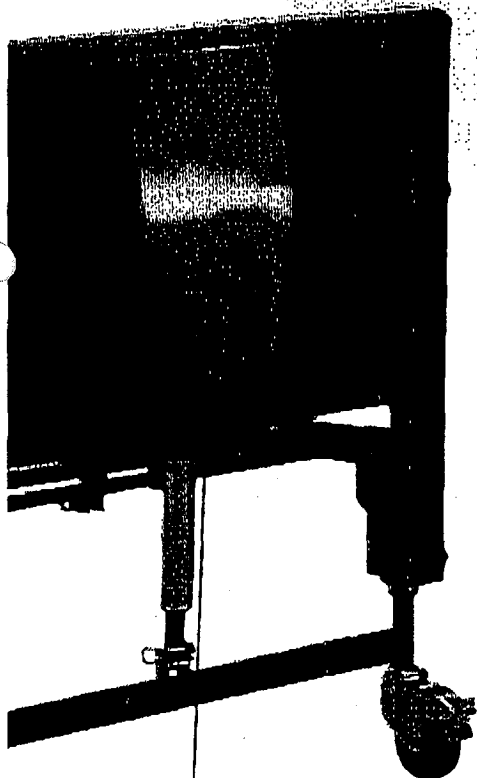

**Built-In low version with Double Brackets**

Easy and quick attachment of Mattress Support to bedends in either 40-80 cm or 33-73 cm adjustment height.

**Increased safety and straight cables for lifting motors**

The turn-around of the lifting motor makes curled cables superfluous, thus improving safety as no stretch is taking place. Secondly, straight cables ease cleaning.

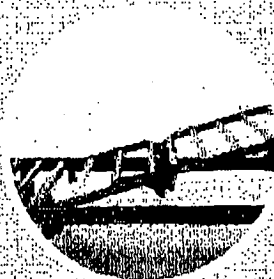

**Motorabdeckung**

Schützt den Motor und reduziert den zusätzlichen Reinigungsaufwand.  
Germany has added this text for the Motorcover to provide the motor

**Well-fitted Cable Network**

Cables are designed to be hug on the bed frame. As a result, there are no loose cables or risk for cables to get tangled or trapped under the bed.

**From 3 to 4 section**

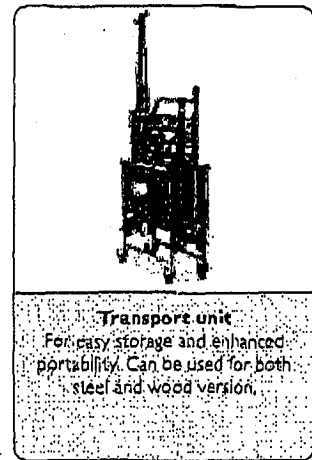

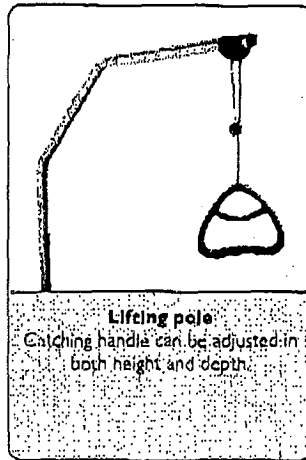

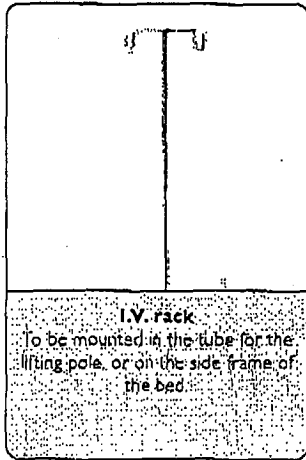

The flexible Etude mattress support is by delivery prepared for a motor upgrade. Just fit a motor, shift the hand control and remove the plug in the control unit, and the bed has become 4 sectioned.

**Unique low position of Scala Mona Wooden side rails**

A low position just 3 cm above Mattress Support level ensures minimum squeezing for the user when leaving or entering the bed.

**Options and Asseccories**

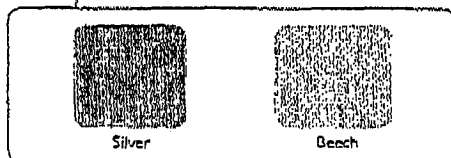

**Technical data**

Inner dimension: 90 cm Outer dimension: - steel: 94 cm - wood: 102 cm	Length outside: 231 cm Length inside: 210 cm Mattress: 200 cm	High-Low, steel and wood: 40-80 cm High-Low, steel: 33-73 cm	85 - 24 - 91 cm (3 - sectioned) 85 - 24 - 35 - 56 (4 - sectioned)	0° to 70° Backrest angle
0° to 22° Tilt angle	0° to 18° Legrest lift	11° Tilt option	Steel: 3-Sec. / 4-Sec. 92 / 97 kg Wood: 3-Sec. / 4-Sec. 98 / 103 kg	SWL: 180 kg Max. user weight: 145 kg

**Bed end design for the Home care environment**

Smooth soft lines combined with the well-known, robust construction make longevity go hand in hand with a domestic furniture style.

**Standard side rails for a wide range of mattress heights**

Standard Wooden and Metal Side-rails are approved for mattress heights up till 17,5 cm - Safe use of anti-decubitus mattresses are accounted for.

**Easy-to-use release button for wooden side rail**

No tools are required to mount or dismount wooden side rails. When fitted the lower release button automatically makes up the lower stop.

To lower the side rail simply lift up the upper wooden bar and press the release button - safe and easy!

The Air Comfort Specialists Present

# Princess Bed

Patented Air Comfort Seating System™

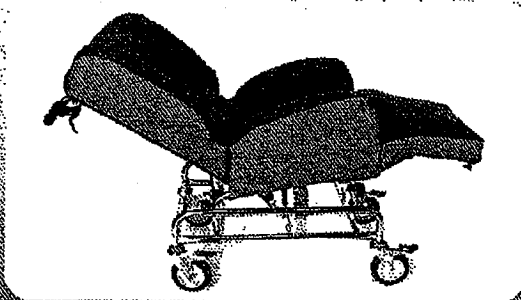

The Ultimate in Pressure Management • Float on a Soft Cushion of Air!

- Utilising the unique Air Comfort Seating System.™
- Complete workstation for the nursing of dependant patients.
- Offers proven pressure relief (See XSENSOR mapping results overleaf).

## Features

- 1 Total surface air pressure system.
- 2 No gaps in seating surface.
- 3 Adjustable seat (Infinite locking).
- 4 Adjustable back (Infinite locking).  
\* Not available on the Princess Chair.
- 5 Adjustable leg rest (Infinite locking).
- 6 Detachable/Adjustable head rest.
- 7 Locking castors (Standard and Directional).
- 8 Full metal frame.
- 9 Replaceable cover.

## Benefits

- 1 Proven pressure relief for long-term seating.
- 2 Varied seating and sleeping positions.
- 3 Easy for nurses to operate and manoeuvre.
- 4 Easy to clean.
- 5 Easy to repair and maintain.

**DIMENSIONS:** Outside back width: 740mm, backrest height: 500mm, sitting height: 1000mm  
 Inside back width: 500mm, seat width: 420mm, foot height: 100mm, seat base depth: 420mm, sitting height: 1020mm, sitting depth: 420mm
