# 1 Yearly Overview

## 1.1 System Activity

### 1.1.1 Summary

Activity Summary 1-Jul-09 to 30-Jun-10		Total
<b>Exports</b>	Inbound Messages Received by ICS	4,390,698
	Outbound Messages Sent to Clients	5,505,702
<b>Imports</b>	Inbound Messages Received by ICS	25,739,586

The table above shows activity based on the volume of messages sent by Industry to ICS (Inbound) or sent by ICS to Industry (Outbound), which are counts of messages from the ICS perspective. As such amendments, duplicates, requests for retransmission, etc are included. For example, an inbound Full Import Declaration, which was then amended twice during the reporting period, would appear as 3 Inbound messages.

Request for Status messages submitted by Customs as part of the Heartbeat Monitoring activity (approx. 240,000 messages) are included in the above figures, showing under Exports.

As of Monday 05 July 2010, the number of messages successfully processed by ICS since implementation was:

<b>Exports</b>	24,253,199
<b>Imports</b>	107,065,769
<b>Total</b>	131,318,968

**Note:**

"Successfully Processed" messages are messages received by ICS, either by EDI or CI, for which a response message was sent, including error messages.

### 1.1.2 Monthly Successfully Processed ICS Messages (EDI and CI)

## 1.2 EDI Message Initial Response Times

Initial Response time is defined as the time from when the message is received to the corresponding initial advice message leaving Customs.

### 1.2.1 Monthly EDI Message Initial Response Time

The chart above shows Initial Response time for all messages as an average and median for the month, as well as the percentage of messages under the target of 5 minutes.

**Note** – due to technical issues, EDI response times for June 2010 do not include data from 26 June to 30 June.

### 1.2.2 Monthly EDI Message Initial Response Time and Message Volume

The chart above shows the median Initial Response Time by month for all messages, as well as the number of messages received.

**Note** – due to technical issues, EDI response times for June 2010 do not include data from 26 June to 30 June.

### 1.2.3 Monthly EDI Message Initial Response Time Breakdown

The chart above shows the percentage of all messages whose Initial Response time fell within the defined time periods. Initial Response time is defined as the time from when the message is received to the corresponding advice message leaves Customs.

**Note** – due to technical issues, EDI response times for June 2010 do not include data from 26 June to 30 June.

### 1.3 Service Availability

#### 1.3.1 Service Available – External

Average availability of services to Customs clients for the 12 months 01-Jul-09 to 30-Jun-10 was 98.93%.

**Note:** Electronic cargo systems availability to Customs clients – Target is 99.7% (availability against a typical work day).

#### 1.3.2 Service Available - Key Systems

For details of Service Issues and Impacts refer to Section 3, page 18.

### 1.3.3 Service Fully Operational

Average operational effectiveness of services for the 12 months 01-Jul-09 to 30-Jun-10 was 95.26%.

The chart above shows the percentage of time the electronic cargo systems were operating at expected performance, with no visible disruption or reduction in expected service for clients.

As an example, a slow down in processing of Customs Interactive or EDI messaging transactions due to a Customs network communications congestion would be treated as not operating at expected performance, even though message processing continued and the service was still available to clients.

### 1.3.4 Service Fully Operational - Key Systems

For details of Service Issues and Impacts refer to Section 3, page 18.
