

Integrated Cargo System Production Report March 2009

Date Prepared: 15 April 2009
Prepared by: Applications Branch, Customs IT

Production Report – March 2009

1	Yearly Overview	3
1.1	System Activity	3
1.1.1	Summary	3
1.1.2	Monthly Successfully Processed ICS Messages (EDI and CI)	4
1.1.3	Monthly Successfully Processed ICS Messages (Imports and Exports).....	4
1.1.4	Successfully Processed ICS Messages by Category (1-Apr-08 to 31 Mar 09).....	5
1.1.5	Imports Successfully Processed ICS Messages by Type (1-Apr-08 to 31-Mar-09).....	5
1.1.6	Exports Successfully Processed ICS Messages by Type (1-Apr-08 to 31-Mar-09).....	6
1.2	EDI Message Initial Response Times	7
1.2.1	Monthly EDI Message Initial Response Time.....	7
1.2.2	Monthly EDI Message Initial Response Time and Message Volume.....	7
1.2.3	Monthly EDI Message Initial Response Time Breakdown	8
1.3	Service Availability.....	9
1.3.1	Service Available – External.....	9
1.3.2	Service Available - Key Systems.....	9
1.3.3	Service Fully Operational	10
1.3.4	Service Fully Operational - Key Systems	10
2	Monthly Detail (Mar 09)	11
2.1	System Activity	11
2.1.1	Summary	11
2.1.2	Inbound Message Volume by Day (Mar 09).....	11
2.1.3	Outbound Message Volume by Day (Mar 09)	12
2.1.4	Production - Daily Successfully Processed ICS Messages (Mar 09).....	12
2.1.5	Exports Successfully Processed ICS Messages by Type (Mar 09)	13
2.1.6	Imports Successfully Processed ICS Messages by Type (Mar 09)	13
2.1.7	Customs Interactive Daily Peak Hour Active Users	14
2.1.8	Customs Interactive Daily Peak Hour System Activity	14
2.1.9	Customs Interactive Daily Peak Hour Successful Logins	15
2.2	EDI Message Initial Response Times	16
2.2.1	Daily EDI Message Initial Response Time (Mar 09).....	16
2.2.2	Daily EDI Message Initial Response Time and Message Volume (Mar 09).....	16
2.3	Outages	17
2.4	Not Performing as Expected.....	17

1 Yearly Overview

1.1 System Activity

1.1.1 Summary

Activity Summary 1-Apr-08 to 31-Mar-09		Total
Exports	Inbound Messages Received by ICS	4,478,965
	Outbound Messages Sent to Clients	5,617,515
Imports	Inbound Messages Received by ICS	23,148,385
	Outbound Messages Sent to Clients	78,503,530

The table above shows activity based on the volume of messages sent by Industry to ICS (Inbound) or sent by ICS to Industry (Outbound), which are counts of messages from the ICS perspective. As such amendments, duplicates, requests for retransmission, etc are included. For example, an inbound Full Import Declaration, which was then amended twice during the reporting period, would appear as 3 Inbound messages.

Request for Status messages submitted by Customs as part of the Heartbeat Monitoring activity (approx. 240,000 messages) are included in the above figures, showing under Exports.

As at midnight **Wed 1 April 09**, the number of messages successfully processed by ICS since implementation was:

Exports	18,944,042
Imports	76,568,657
Total	95,512,699

Note:

"Successfully Processed" messages are messages received by ICS, either by EDI or CI, for which a response message was sent, including error messages.

1.1.2 Monthly Successfully Processed ICS Messages (EDI and CI)

Note:

“Successfully Processed” messages are those received by ICS, for which a response message was sent, including error messages.

1.1.3 Monthly Successfully Processed ICS Messages (Imports and Exports)

Note:

“Successfully Processed” messages are those received by ICS, for which a response message was sent, including error messages.

1.1.4 Successfully Processed ICS Messages by Category (1-Apr-08 to 31 Mar 09)

Note:

“Successfully Processed” messages are those received by ICS, for which a response message was sent, including error messages.

1.1.5 Imports Successfully Processed ICS Messages by Type (1-Apr-08 to 31-Mar-09)

Note:

“Successfully Processed” messages are those received by ICS, for which a response message was sent, including error messages.

1.1.6 Exports Successfully Processed ICS Messages by Type (1-Apr-08 to 31-Mar-09)

Note:

“Successfully Processed” messages are those received by ICS, for which a response message was sent, including error messages.

1.2 EDI Message Initial Response Times

Initial Response time is defined as the time from when the message is received to the corresponding initial advice message leaving Customs.

1.2.1 Monthly EDI Message Initial Response Time

The chart above shows Initial Response time for all messages as an average and median for the month, as well as the percentage of messages under the target of 3 minutes.

1.2.2 Monthly EDI Message Initial Response Time and Message Volume

The chart above shows the median Initial Response Time by month for all messages, as well as the number of messages received.

1.2.3 Monthly EDI Message Initial Response Time Breakdown

The chart above shows the percentage of all messages whose Initial Response time fell within the defined time periods. Initial Response time is defined as the time from when the message is received to the corresponding advice message leaves Customs.

1.3 Service Availability

1.3.1 Service Available – External

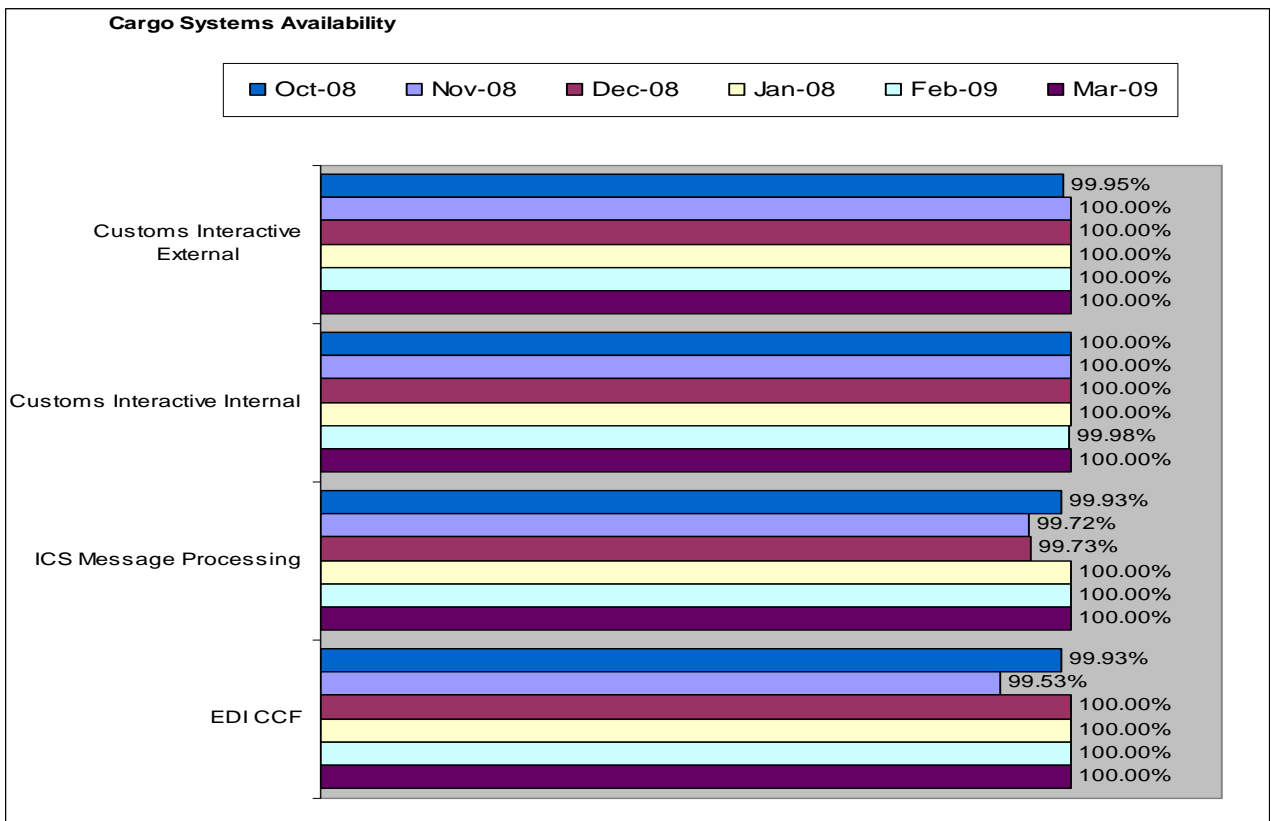

Average availability of services to Customs clients for the 12 months 1-Apr-08 to 31-Mar-09 was 99.47%.

Note:

Electronic cargo systems availability to Customs clients – Target is 99.7% (availability against a typical work day).

1.3.2 Service Available - Key Systems

For details of Service Issues and Impacts refer to Section 0, page 17.

1.3.3 Service Fully Operational

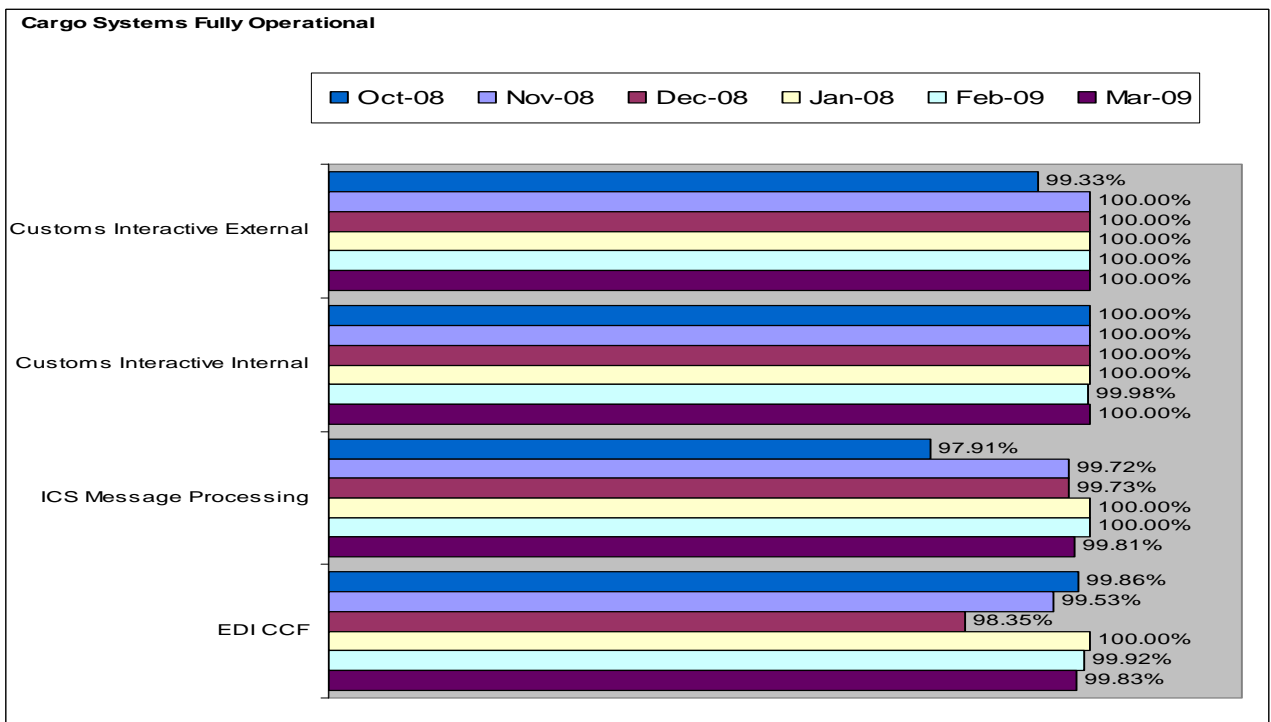

Average operational effectiveness of services for the 12 months 1-Apr-08 to 31-Mar-09 was 97.00%.

The chart above shows the percentage of time the electronic cargo systems were operating at expected performance, with no visible disruption or reduction in expected service for clients.

As an example, a slow down in processing of Customs Interactive or EDI messaging transactions due to a Customs network communications congestion would be treated as not operating at expected performance, even though message processing continued and the service was still available to clients.

1.3.4 Service Fully Operational - Key Systems

For details of Service Issues and Impacts refer to Section 0, page 17.

2 Monthly Detail (Mar 09)

2.1 System Activity

2.1.1 Summary

Sun 01-Mar-09 to Tue 31-Mar-09		Total
Exports	Inbound Messages Received by ICS	386,535
	Outbound Messages Sent to Clients	486,119
Imports	Inbound Messages Received by ICS	1,804,962
	Outbound Messages Sent to Clients	6,177,066

The table above shows activity based on the volume of messages sent by Industry to ICS (Inbound) or sent by ICS to Industry (Outbound), which are counts of messages from the ICS perspective. As such amendments, duplicates, requests for retransmission, etc are included. For example, an inbound Full Import Declaration, which was then amended twice during the reporting period, would appear as 3 Inbound messages.

Request for Status messages submitted by Customs as part of the Heartbeat Monitoring activity (approx. 20,000 messages) are included in the above figures, showing under Exports.

2.1.2 Inbound Message Volume by Day (Mar 09)

2.1.3 Outbound Message Volume by Day (Mar 09)

2.1.4 Production - Daily Successfully Processed ICS Messages (Mar 09)

2.1.5 Exports Successfully Processed ICS Messages by Type (Mar 09)

2.1.6 Imports Successfully Processed ICS Messages by Type (Mar 09)

2.1.7 Customs Interactive Daily Peak Hour Active Users

The chart above shows the number of UserIDs logged in and actively using CI on the Production Web Servers in the Peak Hour during a given day.

2.1.8 Customs Interactive Daily Peak Hour System Activity

The chart above shows the number of data submissions (Posts) in during the Peak Hour a given day and is indicative of the System Activity/Load. An example of "Data Submission" would be a user clicking the "Save" button on an ICS screen.

2.1.9 Customs Interactive Daily Peak Hour Successful Logins

The chart above shows the Successful Logins to the Production web servers during the Peak Hour for a given day.

2.2 EDI Message Initial Response Times

2.2.1 Daily EDI Message Initial Response Time (Mar 09)

2.2.2 Daily EDI Message Initial Response Time and Message Volume (Mar 09)

Service Issues and Impacts

2.3 Outages

Date	Duration	Description
March 2009		
Tuesday 17 Mar 09	15mins	A load balancer in CCF failed, causing messages to queue up. These messages were resent when service restored. No messages were lost.
February 2009		
None		
January 2009		
Wednesday 14 Jan 09	15 mins	Outage required to rectify a deployment problem that affected usage of the Underbond movement screen in ICS.
December 2008		
Wednesday 10 Dec 08	2 hours	Issues during deployment of an ICS upgrade resulted in an overrun of the deployment window.
November 2008		
Thursday 27 Nov 08	3 hours 30min	EDI CCF slowed and then stopped due to file systems filling up. Housekeeping jobs were run to clear the filesystems, and the backlog processed.
Monday 17 Nov 08	2 hours	An underbond transaction was submitted that started to loop. This resulted in ICS triggers failing, and ICS outbound messages stopped. The EDI processing was restarted, and the significant backlog of messages were processed.
October 2008		
Wed 1 Oct 08	30min	A scheduled deployment took 30mins longer than expected, resulting in an additional 30min outage.
Wed 8 Oct 08	4 hours 12 mins	Export declarations could not be successfully lodged, as a result of an issue with the new ICS release. A code fix was deployed to correct the issue.
September 2008		
Monday 8 Sept 08	8hours 30 min	A failed maintenance job resulted in significant queuing in CCF EDI. This was exacerbated by problems in newly deployed industry software, resulting in excessive numbers of invalid messages being sent to Customs. Messages from two companies using this software were disallowed, to reduce the queuing. Messages finally cleared at 5:54pm. Work was then completed to address the problems in the maintenance job, and the job re-run.
August 2008		
None		
July 2008		
Wednesday 9 Jul 08	6 hours	External clients using Telstra unable to login or use EDI. Issue due to a change in the Telstra Internet network resulting in incorrect routing. Resolved at 1:50pm.
June 2008		
Thu 26-Jun-08	2 hours 35 mins	System failure of one server in a server farm caused a large number of EDI messages to be placed in an error state and manual intervention was required to reprocess them.
May 2008		
Thursday 22-May-08	1 hour 45 mins	CI Internal unavailable due to a power cable being accidentally dislodged by a technician.
Thursday 1-May-08	2 hours	The Customs Interactive External system failed to come up after a scheduled change when it was restarted. External Users were unable to logon to the ICS. EDI and CI Internal users were unaffected. This was a recurrence of the issue on 30 April.
April 2008		
Wednesday 30-Apr-08	14 hours 15 mins	The Customs Interactive External system failed to come up after a scheduled change when it was restarted. External Users were unable to logon to the ICS. EDI and CI Internal users were unaffected.
Monday 14-Apr-08	16 mins	One of the three encrypt/decrypt servers were not processing messages correctly. EDI was stopped and the server was removed from the farm then EDI was re-enabled.
Friday 4-Apr-08	2 hours	A rack fan failure caused 50% of EDI not to be processed. Without sufficient cooling from the fan the switch in that rack overheated and traffic to two of the four mail relays was stopped.

2.4 Not Performing as Expected

Date	Duration	Description
March 2009		

Date	Duration	Description
Mon 2 Mar 09	5mins	Messages were delayed due to a node failure in CCF.
Mon 9 Mar 09	54 mins	Messages were delayed in CCF due to issues with the sql agent. The agent was restarted, which resolved the problem.
Tue 24 Mar 09	30 mins	ICS messages delayed 30 mins due to a large volume of incoming messages from AQIS. This was due to the AQIS link being down and message volumes accumulating.
Thu 26 Mar 09	8 hours	EXAMS running very slowly. This was due to network issues within the Baulkham Hills Data Centre.
Fri 27 Mar 09	8 hours	EXAMS running very slowly. This was due to network issues within the Baulkham Hills Data Centre.
Mon 30 Mar 09	3 hours 30 mins	TARCON running very slowly. This was due to network issues within the Baulkham Hills Data Centre
February 2009		
Thu 19 Feb 09	5 hours	ICS reports were unable to be sent to the internal reports repository, due to lack of space. Old files were removed to free up space, and jobs re-run.
Tue 17 Feb 09	24 mins	The ICS CI External & Internal interface was unavailable for 24 minutes.
Various	N/A	There were several instances of CCF servers failing during the month, that resulted in small numbers of EDI messages being corrupted. In some cases these were recovered, however in other instances clients were required to resend messages. This issue is due to known ongoing infrastructure problems.
January 2009		
Wed 21 Jan 09	13 hours	CCF outbound messages were affected by maintenance in the CCF environment. 3,500 messages that were affected were resent.
Wed 14 Jan 09	10 hours	Users were unable to access underbond movements in ICS, due to a deployment issue.
December 2008		
Thu 11 Dec 08	8 hours 40mins	ICS Teradata reporting was delayed due to the failure of the CA7 batch scheduler on the ICS mainframe.
Wed 10 Dec 08	5 hours	5% of EDI inbound messages were being rejected due to an introduced code defect which wasn't handling a particular special character sequence in a message (a single quote). An emergency change was deployed which corrected the problem.
November 2008		
None		
October 2008		
Wed 1 Oct 08	30 mins	A user running a transaction multiple times used a significant portion of available resources, causing a slowdown across all other applications. These transactions were cancelled and performance returned to normal. Changes have been made to ensure this transaction can not be run multiple times concurrently.
Thu 9 Oct 08	7 hours	Some users experienced problems submitting Export Declarations under certain conditions. A code fix was applied to resolve this issue.
Sat 11 Oct – Mon 13 Oct 08	60 hours	ICS and EXAMS running slowly, and in some cases transactions timing out. No root cause determined, but appeared to be connectivity issues, not application issues. Problems resolved on Monday.
Thu 23 Oct 08	2hours 24mins	Delays in ICS processing due to a looping underbond transaction. Transaction withdrawn, and processing times returned to normal.
Fri 31 Oct 08	30mins	Delays in ICS processing due to a looping underbond transaction. Transaction withdrawn, and processing times returned to normal.
September 2008		
Sun 28 Sept 08	8 hours	Connectivity issues due to faulty hardware in network. Router replaced and service restored.
Mon 22 Sept 08	1 hour	Delays in outbound messages due to maintenance jobs not running.
Fri 19 Sept 08	30mins	Delays in outbound messages due to very heavy load from INTERCEPT reporting
Fri 12 Sept 08	11mins	Delays in messages of 11mins from ICS due to very heavy load
Mon 1 Sept 08	2 hours	Delays of up to 10 mins for cargo movement due to queuing on the CCF transform node. Restarting WDI resolved the problem.
August 2008		
Mon 18 August 08	5hrs 23mins	Delays of up to 10mins for EDI outbound message processing, due to WDI experiencing issues in the CCF transform step. Restarting WDI resolved the problem.
Mon 11 August 08	3hours	CCF Transform delays for EDI outbound message processing, due to WDI issues in the CCF transform step. Restarting WDI resolved the problem.
Thu 7 August 08	2hr 27mins	Slowdown for EDI message processing, particularly Air Cargo reports, due to contention. Messages were set to process serially until the backlog had cleared.
July 2008		
Thursday 31 July 08	1 hour	Slowdown in ICS due to looping Underbond transaction. Transaction cancelled and response times returned to normal.
Thursday 17 July 08	6 hours	Export Dec resulted in looping transaction. Intervention and resolution completed before noticeable slowdown in ICS.

Date	Duration	Description
June 2008		
Wed 25-Jun-08	55 hours 30 mins	CCF resend functionality not working after latest release of CCF. A patch was applied to correct the issue.
May 2008		
Fri 30-May-08	1 hour 39 mins	ATD's and Receipts could not be printed due to a disk file system filling up which stopped the service.
Tue 20-May-08 to Thu 22-May-08	Intermittently	Period of network connectivity failures caused reports to fail to be delivered and EDI messages to queue at intervals.
Mon 19-May-08	82 hours	For a period of just over three days after the transition the system intermittently slowed access to CI External. This was due to an incorrect configuration in the gateway environment. EDI was not affected.
April 2008		
None
