1 Yearly Overview

1.1 System Activity

1.1.1 Summary

Activity Summary 1-Apr-11 to 31-Mar-12		Total
Exports	Inbound Messages Received by ICS	4,620,687
	Outbound Messages Sent to Clients	5,865,158
Imports	Inbound Messages Received by ICS	34,696,175
	Outbound Messages Sent to Clients	121,937,645

The table above shows activity based on the volume of messages sent by Industry to ICS (Inbound) or sent by ICS to Industry (Outbound), which are counts of messages from the ICS perspective. As such amendments, duplicates, requests for retransmission, etc are included. For example, an inbound Full Import Declaration, which was then amended twice during the reporting period, would appear as 3 Inbound messages.

Request for Status messages submitted by Customs & Border Protection as part of the Heartbeat Monitoring activity (approx. 240,000 messages) are included in the above figures, showing under Exports.

As of Tuesday 10 April 2012, the number of messages successfully processed by ICS since implementation was:

Exports	32,001,326
Imports	162,254,793
Total	194,256,119

Note:

"Successfully Processed" messages are messages received by ICS, either by EDI or CI, for which a response message was sent, including error messages.

1.1.2 Monthly Successfully Processed ICS Messages (EDI and CI)

Note: "Successfully Processed" messages are those received by ICS, for which a response message was sent, including error messages.

1.1.3 Monthly Successfully Processed ICS Messages (Imports and Exports)

Note: "Successfully Processed" messages are those received by ICS, for which a response message was sent, including error messages.

1.1.4 Successfully Processed ICS Messages by Category (1-Apr-11 to 31-Mar-12)

Note: "Successfully Processed" messages are those received by ICS, for which a response message was sent, including error messages.

1.1.5 Imports Successfully Processed ICS Messages by Type (1-Apr-11 to 31-Mar-12)

Note: "Successfully Processed" messages are those received by ICS, for which a response message was sent, including error messages.

1.1.6 Exports Successfully Processed ICS Messages by Type (1-Apr-11 to 31-Mar-12)

Note: "Successfully Processed" messages are those received by ICS, for which a response message was sent, including error messages.

1.2 EDI Message Initial Response Times

Initial Response time is defined as the time from when the message is received to the corresponding initial advice message leaving Customs & Border Protection.

1.2.1 Monthly EDI Message Initial Response Time

The chart above shows Initial Response time for all messages as an average and median for the month, as well as the percentage of messages under the target of 5 minutes.

Note: Due to a problem with the EDI message response times data load, data for July and August 2011 was impacted upon.

1.2.2 Monthly EDI Message Initial Response Time and Message Volume

The chart above shows the median Initial Response Time by month for all messages, as well as the number of messages received.

Note: Due to a problem with the EDI message response times data load, data for July and August 2011 was impacted upon.

1.2.3 Monthly EDI Message Initial Response Time Breakdown

The chart above shows the percentage of all messages whose Initial Response time fell within the defined time periods. Initial Response time is defined as the time from when the message is received to the corresponding advice message leaves Customs & Border Protection.

Note: Due to a problem with the EDI message response times data load, data for July and August 2011 was impacted upon.

1.3 Service Availability

1.3.1 Service Available – External

Average availability of services to Customs & Border Protection clients for the 12 months 01-Apr-11 to 31-Mar-12 was 99.47%.

Note: Electronic cargo systems availability to Customs & Border Protection clients – Target is 99.7% (availability against a typical work day).

1.3.2 Service Available - Key Systems

For details of Service Issues and Impacts refer to Section 3, page 3.

1.3.3 Service Fully Operational

Average operational effectiveness of services for the 12 months 01-Apr-11 to 31-Mar-12 was 98.71%.

The chart above shows the percentage of time the electronic cargo systems were operating at expected performance, with no visible disruption or reduction in expected service for clients.

As an example, a slow down in processing of Customs Interactive or EDI messaging transactions due to a Customs & Border Protection network communications congestion would be treated as not operating at expected performance, even though message processing continued and the service was still available to clients.

1.3.4 Service Fully Operational - Key Systems

For details of Service Issues and Impacts refer to Section 3, page 3.

2 Monthly Detail (March 2012)

2.1 System Activity

2.1.1 Summary

Thu 01-Mar-12 to Sat 31-Mar-12		Total
Exports	Inbound Messages Received by ICS	405,611
	Outbound Messages Sent to Clients	518,696
Imports	Inbound Messages Received by ICS	3,183,152
	Outbound Messages Sent to Clients	11,150,570

The table above shows activity based on the volume of messages sent by Industry to ICS (Inbound) or sent by ICS to Industry (Outbound), which are counts of messages from the ICS perspective. As such amendments, duplicates, requests for retransmission, etc are included. For example, an inbound Full Import Declaration, which was then amended twice during the reporting period, would appear as 3 Inbound messages.

2.1.2 Inbound Message Volume by Day (Mar-12)

2.1.3 Outbound Message Volume by Day (Mar-12)

2.1.4 Production - Daily Successfully Processed ICS Messages (Mar-12)

2.1.5 Exports Successfully Processed ICS Messages by Type (Mar-12)

2.1.6 Imports Successfully Processed ICS Messages by Type (Mar-12)

2.1.7 Customs Interactive Daily Peak Hour Active Users

The chart above shows the number of UserIDs logged in and actively using CI on the Production Web Servers in the Peak Hour during a given day.

2.1.8 Customs Interactive Daily Peak Hour System Activity

The chart above shows the number of data submissions (Posts) in during the Peak Hour a given day and is indicative of the System Activity/Load. An example of "Data Submission" would be a user clicking the "Save" button on an ICS screen.

2.1.9 Customs Interactive Daily Peak Hour Successful Logins

The chart above shows the Successful Logins to the Production web servers during the Peak Hour for a given day.

2.2 EDI Message Initial Response Times

2.2.1 Daily EDI Message Initial Response Time (Mar-12)

Note: Due to a problem with the data log and collection server, data for 16 March 2012 was impacted upon.

2.2.2 Daily EDI Message Initial Response Time and Message Volume (Mar-12)

Note: Due to a problem with the data log and collection server, data for 16 March 2012 was impacted upon.

3 Service Issues and Impacts

3.1 Outages

Date	Duration	Description
March 2012		
Sat 24 Mar 2012	3 hrs 3 mins	EDI message processing not working due to CCF issue. Resolved by restart of Websphere Data Interchange.
February 2012		
None		
January 2012
