TARIFF ADVICE OVERVIEW

What is a tariff advice and who enters them?

A tariff advice is an application to Customs to provide a tariff classification on a good or goods being imported into Australia. An importer, a broker acting on behalf of an importer or Customs officer entering a tariff advice on behalf of an importer may apply for a tariff advice to learn or confirm the correct classification for goods they intend to import into Australia.

How is a tariff advice entered?

A tariff advice application is entered using the Tariff and Precedents Information Network (TAPIN). TAPIN is accessed by industry and Customs officers via the Customs Connect Facility (CCF).

Why are tariff classifications important?

Different classifications attract different rates of duty and different concessional treatments. Establishing the classification of import goods is an important part of assessing the business ramifications of importing a particular product.

Tariff advices are also referred to by Customs officers in their daily duties, however, specific advices are only externally available through the tariff advice component of the TAPIN system to the applicant who requested them.

Tariff advice process

When submitted, the tariff advice application will be issued with a tariff advice number by TAPIN and will have a status of Input. The tariff advice application must be printed and sent to Customs (within seven calendar days) with any relevant supporting material (eg, samples or illustrative descriptive material). This can be done at by FAX, post or at a Customs counter.

When Customs receives a paper copy of the tariff advice application and all the required fields are correct, the tariff advice application is lodged by Customs. Alternatively, if the form is not complete, Customs may request further information.

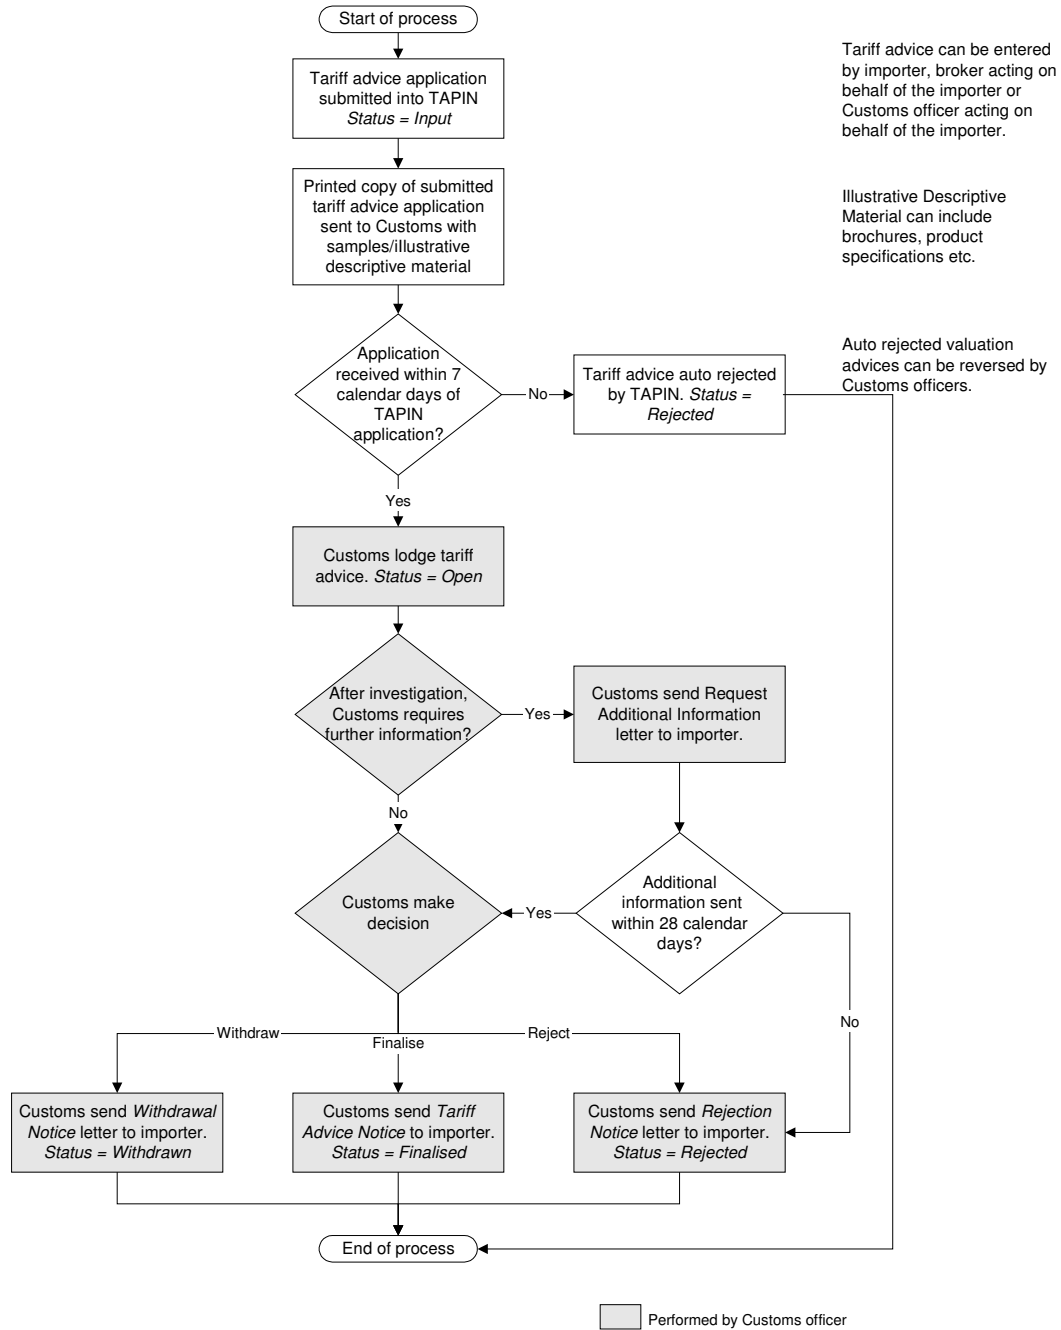

Customs will now make one of the following decisions on the application:

- additional information required – Customs requires more information to make a decision
- withdraw – the applicant has decided to withdraw the application
- reject – the application is rejected by Customs
- finalise (single or multiple) – tariff advice notice(s) is/are issued to the client. A tariff advice notice is a commercial-in-confidence response to the applicant, based on the information the client provides to Customs in the application.

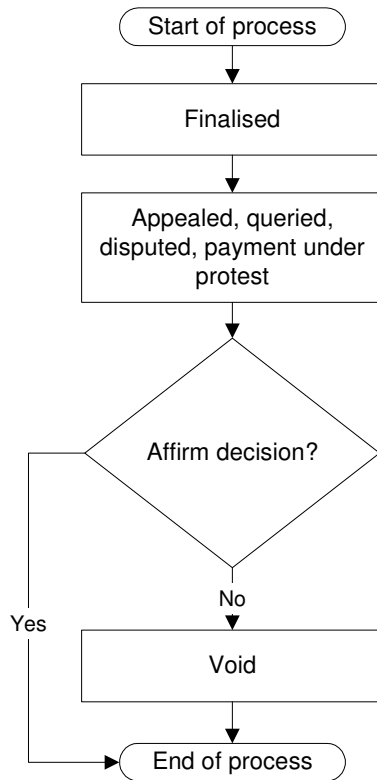

Any change in status to the tariff advice after it has been finalised is recorded.

There are cases where tariff advices need to be voided. Possible reasons include the expiry of a tariff classification or where a specific tariff advice is being voided due to a review of that tariff advice.

Common flow of a tariff advice

Options when tariff advice is finalised

Voiding a tariff advice makes the advice invalid.

INPUTTING A TARIFF ADVICE

The Tariff Advice Input screen enables users with the appropriate access to input a tariff advice into the Tariff and Precedents Information Network (TAPIN). A tariff advice is a request to learn or confirm the correct classification for goods the importer intends to import into Australia.

User access

The following users have access to this screen:

- Customs Officers
- external users with the role of Broker.

Prerequisite

The supplier, importer and applicant must be registered as a client in the Integrated Cargo System (ICS).

To input a tariff advice:

Step 1. From the main menu, click on **TAPIN**, click on **Tariff Advice** and then click on **Input**.

The **Tariff Advice Input** screen displays.

The screenshot shows the 'Tariff Advice Input' web application running in Microsoft Internet Explorer. The page has a dark blue header with the Australian Government logo and 'TPN DEV' text. The main content area is yellow and divided into three sections: 'Tariff Advice Details', 'Company and Contact Details', and 'Goods Details'. A left-hand navigation menu is visible, showing options like 'HOME', 'HELP', 'TAPIN', 'Tariff Advice', 'Search', 'Input', 'Valuation Advice', and 'Logout'. The 'Tariff Advice Details' section includes fields for 'Previous Tariff Advice Number', 'Type' (set to 'TARIFF ADVICE'), 'Input Date' (5 AUG 2005), 'State for Lodgement' (NSW), 'Lodge Date', 'Confidential' (NO), 'Acquit Date', and 'Void Date'. The 'Company and Contact Details' section has fields for 'Importer', 'Supplier', 'Applicant', 'Applicant Contact Name', 'Applicant Reference', 'Broker Box No', 'ABN', 'CAC', 'Customs Client Id', 'Ph', and 'Fax'. The 'Goods Details' section includes 'Goods Description' (with an 'Input' link), 'Claimed Tariff Classification', 'Claimed Instrument Number', 'Claimed Schedule 4 Item Number', and 'Claimed Reasons' (with an 'Input' link). At the bottom right, there are 'Submit' and 'Cancel' buttons.

The Tariff Advice Input screen allows users to enter a tariff advice application. A tariff advice application is used to learn or confirm the correct classification for goods that an importer intends to import.

Input Date, Lodge Date, Acquit Date and Void Date fields are read only.

The Tariff Advice Input screen is divided into three sections:

- Tariff Advice Details – contains details of the tariff advice including previous tariff advice number, type, state for lodgement, relevant dates and confidential indicator
- Company and Contact Details – contains the details of the importer, supplier and applicant, including contact details, the applicant's own reference and broker box number
- Goods Details – contains the applicant's own goods description, claimed classification details and reasons.

Step 2. (Optional) In the **Previous Tariff Advice Number** field, if a tariff advice has been issued for these goods since 1996, enter tariff advice number previously used. If there have been multiple Tariff Advices for these goods, the most recent should be input.

Step 3. The **Type** field, defaults to TARIFF ADVICE.

Note: once the advice has been submitted, the system will automatically generate the Type according to the information entered in the Claimed Tariff Classification, Claimed Instrument Number and Claimed Schedule 4 Item Number fields.

Step 4. In the **State for Lodgement** field, click on the drop down button and select one of the following states to lodge the tariff advice in:

- ACT
- NSW
- NT
- QLD
- SA
- TAS
- VIC

- WA.

Step 5. In **Confidential** field, click on the drop down button and select **NO** (default) or **YES**.

This is used to indicate if the goods description and/or reasons for the decision are of a confidential nature. An applicant may choose this so that a goods description and/or claimed reasons are not used in a tariff precedent.

Note: any Australian Business Numbers (ABNs) or Client Activity Centres (CACs) entered in Steps 6-8 must be registered in the ICS.

Step 6. In the **Importer** fields, perform one of the following:

- in the **ABN** field, enter the ABN of the party importing the goods
- in the **ABN** and **CAC** fields, ABN and CAC of the party importing the goods
- in the **Customs Client Id** field, enter the Customs Client Identifier of the party importing the goods.

Note that the importer is not the broker.

Step 7. In the **Supplier** fields, enter the Customs Client Identifier of the party supplying the goods.

Step 8. In the **Applicant** fields, perform one of the following:

- in the **ABN** field, enter the ABN of the party completing this application
- in the **ABN** and **CAC** fields, enter the ABN and CAC of the party completing this application
- in the **Customs Client Id** field, enter the Customs Client Identifier of the party completing this application.

Step 9. In the **Applicant Contact Name** field, enter the name of the contact for the party completing this application.

Step 10. In the **Ph** field, enter the phone number of the contact for the party completing this application.

Step 11. (Optional) In the **Applicant Reference** field, enter the unique reference number as issued by the applicant. This can be used by applicants to track an application. Please note that this may also be used to give a contact email address if desired.

Step 12. (Optional) In the **Fax** field, enter the fax number for the party completing this application.

Step 13. (Optional) In the **Broker Box No** field, enter the box number of the broker making the application on behalf of the importer.

Step 14. Click on the **Input** hyperlink under Goods Description.

The **Input Goods Description** screen displays.

The Input Goods Description screen allows users to enter a full description of the goods being submitted for classification.

Step 15. In the **Goods Description** field, enter a full and accurate description of the goods being submitted for classification. The description should include, where relevant, composition, quality, packaging, manufacturing process, end use etc. A description that consists of only part numbers, patent and registered names, for example, is not satisfactory and may result in the application being rejected.

Step 16. Click on the **OK** button.

A confirmation box displays.

Step 17. Click on the **OK** button.

The **Tariff Advice Input** screen redisplay with the first 200 character of the Goods Description.

Step 18. In the **Claimed Tariff Classification** fields, enter the tariff classification that the applicant considers applies to the goods description entered (in Step 15). The claimed tariff classification must be four, six or eight characters in length.

Step 19. (Optional) In the **Claimed Instrument Number** field, if this application is in relation to the applicability of a tariff concession order or by-law, enter the number of the instrument that the applicant considers relevant.

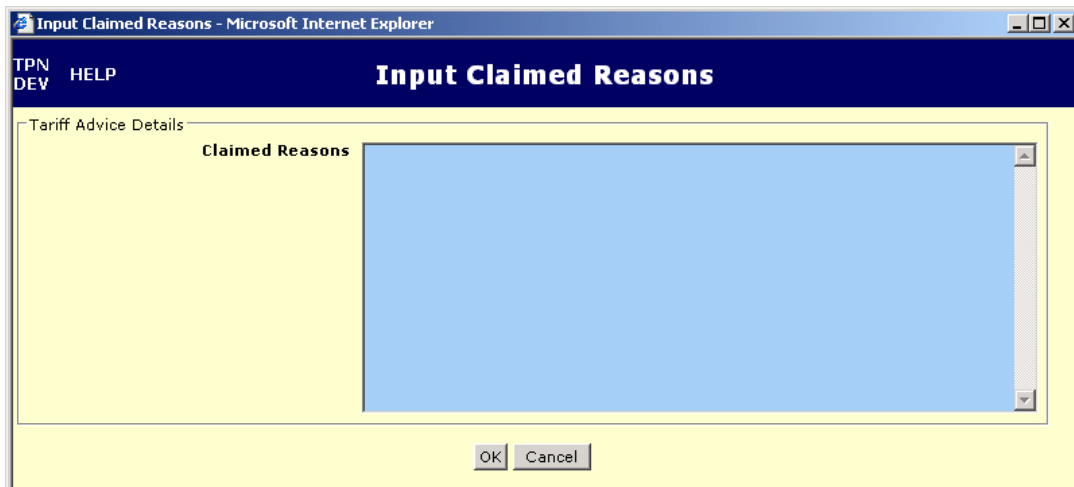

The claimed instrument number entered must exist and be active. If a tariff concession order is entered, it must relate to the claimed tariff classification as entered (in Step 18).

Step 20. (Optional) In the **Claimed Schedule 4 Item Number** field, if the application is in relation to a schedule 4 item number, enter the Item Number that the applicant considers relevant.

The claimed schedule 4 item number must exist and be active. If a claimed instrument number is entered, the claimed schedule 4 item number field will be automatically generated when the advice is saved.

Step 21. Click on the **Input** hyperlink under Claimed Reasons.

The **Input Claimed Reasons** screen displays.

The Input Claimed Reasons screen allows users to enter reasoning in relation to a claimed tariff classification, claimed instrument number or claimed schedule 4 item number entered on the Tariff Advice Input screen.

Step 22. In the **Claimed Reasons** field, enter a clear, concise statement giving complete details, with reasons, for either acceptance or rejection of the tariff classification, instrument or schedule 4 item entered in Steps 17 – 19. This statement should also indicate references consulted, for example, explanatory notes, dictionary, encyclopaedia, etc.

Step 23. Click on the **OK** button.

A confirmation box displays.

Step 24. Click on the **OK** button.

The **Input Tariff Advice** screen redisplay.

Note: to exit this screen without saving, click the Cancel button.

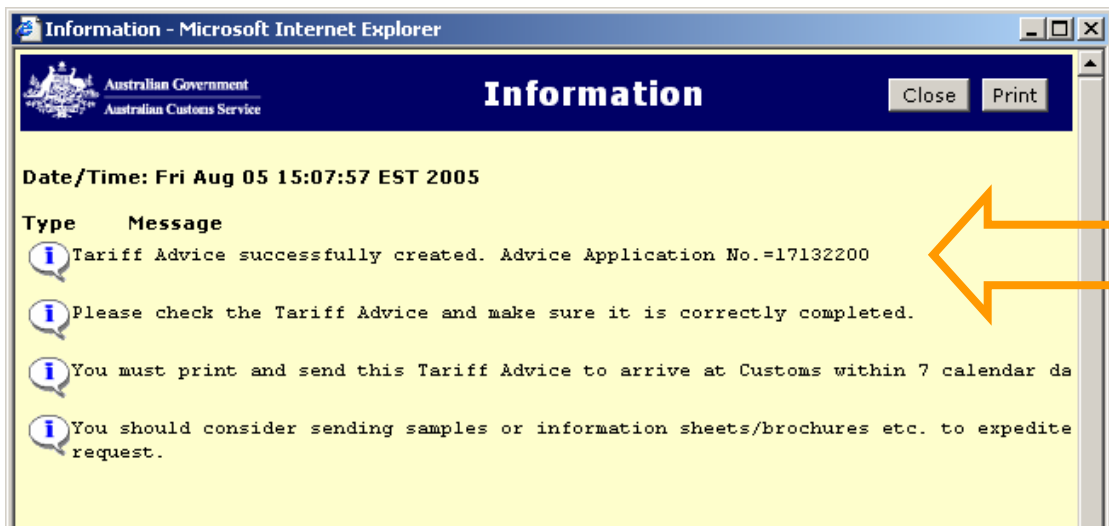

Step 25. Click on the **Submit** button.

A confirmation box displays.

Step 26. Click on the **OK** button.

The **Information** screen displays.

The Information screen displays information messages relevant to the action that has just been performed. Information messages are not error messages.

Note: the Advice Application Number for tariff advice entered is displayed in the first message, make a record of this number for future reference.

Step 27. Click on the **Close** button.

The **Tariff Advice View** screen displays. Refer to page **2.17**.

SEARCHING FOR A TARIFF ADVICE

The Tariff Advice Search screen allows users with the appropriate access to search for tariff advices.

Note: only Tariff Advice applications that are registered against the users ABN will be retrieved.

User access

The following users have access to this screen:

- Customs officers
- external users with the role of BROKER.

To search for a tariff advice:

Step 1. From the main menu, click on **TAPIN**, click on **Tariff Advice** and then click on **Search**.

The **Tariff Advice Search** screen displays.

The screenshot shows a web browser window titled "Tariff Advice Search - Microsoft Internet Explorer". The page header includes the Australian Government logo, "TPN DEV", and "Australian Customs Service". The main heading is "Tariff Advice Search".

On the left is a navigation menu with "HOME" and "HELP" at the top, followed by "TAPIN" and "Tariff Advice" (expanded to show "Search", "Input", "Valuation Advice", and "Logoff").

The main content area has a "Select Combination" dropdown menu set to "Tariff Advice Number". Below this is a "Search Criteria" section with the following fields:

- Tariff Advice Number:
- Status: INPUT (dropdown)
- Client Type: (dropdown)
- ABN:
- Customs Client Id:
- Claimed Tariff Classification: . .
- Given Tariff Classification: . .
- Lodge Date (from): / / (dropdown)
- Lodge Date (to): / / (dropdown)
- Acquit Date (from): / / (dropdown)
- Acquit Date (to): / / (dropdown)
- State: ACT (dropdown)

There is a "Show Multiples" checkbox which is checked. At the bottom of the search criteria are "Search" and "Clear" buttons.

The Tariff Advice Search screen enables users to search for a number of tariff advices or a single tariff advice. The default search criteria in the Select Combination field will be Tariff Advice Number. Depending on the search combination selected, mandatory fields for that select combination will be highlighted. All other fields are disabled.

Step 2. In the **Select Combination** field, click on the drop down button and select one of the following options:

- Tariff Advice Number
- ABN & Client Type
- CCID & Client Type
- Claimed Tariff Classification & Status
- Lodge Date (from) & Lodge Date (to) & Status
- Given Tariff Classification & Status
- Acquit Date (from) & Acquit Date (to) & Status
- Status & State.
-

Awaiting Additional Info Check Box

If the Awaiting Additional Info Check Box is checked, it selects those records for which additional information has been requested, but not yet received. The Awaiting Additional Info Check Box is only enabled when Open status is selected from the status field.

Step 3. Enter the relevant values in the mandatory fields.

Note: to clear the search criteria entered, click on the Clear button.

Step 4. Click on the **Search** button.

If one record is found, the **Tariff Advice View** screen displays. Refer to page 2.17.

If more than one record is found, the **Tariff Advice List** screen displays.
