CUSTOMS ACT 1901**INTENTION TO REVOKE A TARIFF CONCESSION ORDER**

It is intended to revoke the Tariff Concession Order for the goods described in the following TABLE.

I, Michael Perry, a delegate of the Chief Executive Officer (CEO), declare my intention, subject to s.269SD(1AB), to make an order revoking the TCO in the table below with effect from 26 April 2012. On 26 April 2012, I formed the belief in respect of the TCO, that if the TCO was not in force on that day, and an application for the TCO was made on that day, the CEO would not have made the TCO.

That is because the TCO was made in contravention of s.269P(4), to the extent that the TCO requires a description of the goods and the subject of the order including a reference to the Customs tariff classification that, the opinion of the CEO, applies to the goods. A tariff classification review found that the goods are not a set and cannot be classified together.

Interested parties are invited to provide, by close of business Wednesday 30 May 2012, written reasons why this TCO should not be revoked. Interested parties may consider applying for a new Tariff Concession Order on the application form, B443 (updated March 2010) for the goods described below, worded in terms that are classifiable to only one tariff classification.

GENERAL INFORMATION

This Gazette contains details of quota transactions processed in the period 24 Apr 2012 to 01 May 2012 inclusive.

Part 1 contains a Table specifying quota category details.

Part 2, Section A, lists quota holders who received quota allocations via transfer transactions.

Part 2, Section B, lists all adjustments to previous allocations which have been caused by transfer transactions.

NB.- In Section B, transactions represent changes to individual tariff quotas and do not necessarily represent the entire holdings in that category for the quota holder.

- The "AS WAS" and "AS IS" columns indicate the quota levels for that particular tariff quota only at the time of that transaction.
- The amount of the transaction can be deduced by subtracting the "AS WAS" column from the "AS IS" column.

Inquiries concerning any information published within this Gazette should be directed to the Trade Branch, Australian Customs and Border Protection Service, Customs House, 5 Constitution Avenue, Canberra City, ACT, 2601.

Cheese and Curd Quota Scheme – Allocations for 2012–2013

In early June 2012, the Australian Customs and Border Protection Service will contact cheese quota holders as part of its work on quota allocations for 2012–2013.

The calculation of an importer's forthcoming allocation is based on the actual use of quota by that importer in the 23-month period ending 31 May 2012, as shown in Customs' records of Import Declarations lodged between **01 July 2010 and 31 May 2012**.

We remind importers that quotas are allocated for a particular financial year. To use the quota allocated, importers are required to 'enter for home consumption' their imported cheese or curd by the end of the financial year to which the allocation relates, that is, by 30 June of that year. Where cheese or curd importations are of Australian origin (returned Australian goods), or a free rate of duty is provided under Schedule 3 of the *Customs Tariff Act 1995*, preference circumstances, or a Free Trade Agreement (FTA), quota cannot be used.

The cheese or curd is 'entered for home consumption' if:

- (a) an entry for home consumption for the goods is lodged with Customs; **and**
- (b) the vessel or aircraft carrying the cheese or curd has arrived at the first Australian port or airport at which any cargo is intended to be discharged.

If an importer does not meet these conditions by the end of the particular financial year to which the quota relates, the goods are 'entered for home consumption'

- under quota for the following financial year (if the importer has sufficient quota for that year), or
- without concession at the rate of Customs duty applicable to the relevant subheading of Schedule 3 of the *Customs Tariff Act*.

Please note that:

- The quota calculation excludes any part of the quota transferred to another importer during the 23-month period or that remains unused at **31 May 2012**.
- Quota used during the month of June 2011 will be taken into consideration for allocation 2013–2014, but will NOT count in computations for 2014–2015. This June 'factor' is repetitive for every annual allocation because of the 31 May import performance cut-off for calculation of following years' allocations.

At this time of the year, quota users and their brokers should take stock of quota balances with a view to maximising usage and consequently maximising their next allocation.

We will publish the final allocation in the *Commonwealth of Australia: Tariff Concessions Gazette* in July 2012.

Where you anticipate quota usage shortfalls, there is an option to transfer allocations between importers. You can apply for a transfer by completing a Transfer of Base Quota (Cheese and Curd) form (form B235) and submitting it to:
