CUSTOMS ACT 1901**INTENTION TO REVOKE TARIFF CONCESSION ORDERS**

It is intended to revoke the Tariff Concession Order for the goods described in the following TABLE.

The Chief Executive Officer's (CEO's), delegate has declared the intention, subject to s.269SD(1AB), to make an order revoking the TCO in the table below with effect from Thursday 13 November 2014. On 14 October 2014, the CEO's delegate formed the belief in respect of the TCO, that if the TCO was not in force on that day, and an application for the TCO was made on that day, the CEO would not have made the TCO.

That is because the TCOs are considered to be unnecessary. A TCO is considered to be unnecessary if the goods covered by that TCO can be imported under another, often more recent, TCO that often covers a broader range of goods.

Importers and customs brokers will not be disadvantaged by the revocation action, as TCOs will continue to apply to the same range of goods. Before attempting to use a TCO, an importer or customs broker should check the list of concessional instruments to ensure that the TCO still exists.

Interested parties are invited to provide, by close of business Wednesday 12 November 2014, written reasons why the TCOs should not be revoked.

Contact: email tarcon@customs.gov.au , fax 02 6275 6376 or telephone 02 6122 5540.

For information on these Customs initiated revocations see Australian Customs Notice (ACN) 2003/68 available for free on the Customs and Border Protection website:

CONSULTATION - LEGISLATIVE PROPOSAL: DEREGULATION

Public comment is sought on a proposal to remove a redundant provision in the *Customs Act 1901* that requires manufacturers to supply details of their manufacturing costs when seeking to revoke a Tariff Concession Order (TCO), or objecting to the making of a TCO.

Background

Australian manufacturers have the right to apply to revoke a Tariff Concession Order or to object to the making of a new Tariff Concession Order. To do so, Australian manufacturers must meet two tests relating to their production. They are required to provide evidence that at least 25% of factory costs occur in Australia and demonstrate that a substantial process of manufacture occurs in Australia.

In the last 100 cases where the Australian manufacturer demonstrated that a substantial process of manufacture occurred in Australia, they always easily exceeded the 25% costs test. The costs' test is therefore unnecessary and imposes a significant financial workload on Australian manufacturers. Provision of costings is time-consuming as balance sheets, accounting worksheets, sales invoices and other commercial-in-confidence material may be required. Additional costs can be incurred if cases are subsequently contested in the Administrative Appeals Tribunal and it becomes necessary to seek to maintain confidentiality of costing information.

The use of a single test will align the TCS with Australia's anti-dumping legislation, which requires Australian manufacturers to meet only one test - that they can demonstrate a substantial process of manufacture occurs in Australia.

Legislative change proposed

Paragraph 269D(1)(b) of the *Customs Act 1901* requires that in order for goods to be regarded as "produced in Australia" the sum of the value of Australian labour, Australian materials and factory overhead costs must not be less than 25% of the factory costs of the goods.

It is proposed that this paragraph be removed from section 269D. This will simplify the objection/revocation process while retaining the core requirement that an Australian manufacturer must undertake a substantial process of manufacture in Australia. Consequential amendments to delete subsections 269D(4) and (5) would also be required.

Making a submission

Australian Customs and Border Protection Service is inviting stakeholder comment on a proposal to amend legislation in Part XVA of the *Customs Act 1901*. The proposal has been developed as part of the Government's deregulation agenda.

Feedback will be taken into account in the development of final proposals to the government.

Closing date for submissions is 5 November 2014.

Submissions should be addressed to tarconconsult@customs.gov.au or to:

Director, Industry Assistance
Trade and Customs Division
5 Constitution Avenue
Canberra ACT 2601

Customs and Border Protection will treat submissions as public documents, and will publish them on its website unless the author expressly states that they would like all or part of the submission to remain in confidence.

Note that the Disability and Discrimination Act requires that all information published on the website be accessible to all. Therefore we prefer all submissions to be sent to us both in PDF (unsecured) and in Word or RTF. If you choose not to attach an accessible version of your submission, we will contact you if a request for an accessible version is received.

Please ensure that your submission does not include any personal information such as home address and phone number.

As this information is intended to inform government decision-making, it is possible that Customs and Border Protection may make submissions available to other Commonwealth Government departments. Any submission received may be subject to requests for disclosure under the Freedom of Information Act 1982.

Please direct any enquiries about this matter to the Director, Industry Assistance, Australian Customs and Border Protection Service on 02 6245 5492.

NOTICE OF DETERMINATIONS MADE UNDER PART XVI OF THE CUSTOMS ACT 1901

Under subsection 273B(2) of the Customs Act 1901, notice is hereby given of the making of determinations applying to goods of a kind specified in the table below.

In the table:

(i) the first column specifies the kind of goods to which the determination applies, any conditions specified in the determination, the commencement and cessation dates of the determination and the Determination reference number;

(ii) the second column specifies the item in Schedule 4 to the Customs Tariff Act 1995 that applies to the specified goods.

Goods ancillary to an EPBS project, including office equipment, buildings, office/personnel accommodation and goods used in activities such as land preparation, road construction and maintenance, transportation (other than pipes, pipelines, conveyors, power transmission lines, flexible flow lines, etc integral to the project and used to convey gas liquids, minerals, electricity or other materials or goods) and the provision of telecommunications and other general services are excluded. Materials, consumables and construction and servicing equipment, including all fuels, oils lubricants, adhesives, filters, protective garments, tools, ladders (other than articles auxiliary to and designed to be permanently attached to eligible goods under EPBS, such as pylons, supporting structures, staircases, ladders, railings, etc) paint, varnish and the like are ineligible under EPBS, as are spare parts used for on-going maintenance beyond the commissioning of the project.

EPBS Determinations also apply to all goods listed in the Determination when they are imported in multiple shipments, which may be from different locations at different times.

Where a number of EPBS Determinations are issued for a particular eligible good, all associated Determinations must not exceed the quantity of goods approved by the Delegate in the EPBS Project Eligible Goods List.
